

People Analytics adoption is within your reach!

Can your People Analytics data and tools be optimized for your organization?

Yes, they can!

We make it easy to get started.

Most organizations collect data about their people but making sense of all of that information can be tough. Research shows 85% of large organizations are committed to creating a data-driven culture, but only 37% report success.¹ Part of the problem for many organizations is a lack of understanding on how to interpret and take action on the people data and analytics that support business goals. Where do you start?

Partner with Turetsky Consulting's People Analytics experts to harness the potential in your data, drive business outcomes and guide you towards building a solid People Analytics practice.

Our aim is to empower you to glean insights independently.

With People Analytics consulting services delivered by Turetsky Consulting, you can:

Optimize your data used in analytics

Develop an internal and external strategy for people analytics

Develop the program to train your leaders and managers

Here are some ways we can help:

- Assessment of your current reporting and analytics capabilities
- Clean up your data for more effective reporting and insights
- Development of a plan to roll-out your HR analytics strategy
- Connect HR data and analytics to improving business outcomes
- Help you understand your analytic tools and how to put them into action

Partner with the right resources so you reach your People Analytics goals **faster**.
